

Easter Egg Bath Bombs

fizzing bath treats colored with clay

Ingredients

- 1 cup (240 g) Baking Soda
- 1/2 cup (120 g) Citric Acid
- 1 tablespoon (15 g) Sea Salt, Fine
- 1 teaspoon (5 g) Rose Clay
- 1 teaspoon (5 g) Yellow Kaolin Clay
- 1 teaspoon (5 g) French Green Clay
- 1 teaspoon (5 g) Coral Kaolin Clay
- 2 tablespoons (30 ml) Shea Butter, melted
- 2 teaspoons (10 ml) Apricot Plant-Based Fragrance Oil
- 1 teaspoon (5 ml) Witch Hazel
- 4 jumbo-sized plastic Easter eggs

Makes four jumbo sized bath bombs

Direction

1. Prep the Easter eggs by snipping a small crack into the edge of each Easter egg (top and bottom). This will help make un-molding the bath bombs later a little easier.
2. Combine the baking soda, citric acid, and sea salt in a large mixing bowl and whisk together. Break up any clumps to make sure the powders are uniformly blended.
3. Divide the mixture equally into four smaller bowls. (Each bowl should have about 93 grams of powder.) Add 1 tablespoon of clay to each bowl and whisk together.
4. Combine the melted shea butter, plant-based fragrance oil, and witch hazel in a small container and whisk vigorously.
5. Add 2 1/4 teaspoons of the mixture to each bowl and stir well. Use your hands to blend the powders with the liquids. The powder should be just wet enough to pack together.
6. Fill each Easter egg with the powdered bath bomb mixture. You can make each bath bomb a single color, or fill the eggs in layers to give the bombs a layered look. Pack each egg tight with powder, overfilling each side just a little. Press the two sides together until they stick. Set the filled eggs in a cool, dry place to cure overnight.
7. The next day, carefully remove the bath bombs from the plastic eggs. You may need to cut or crack the eggs further in order to remove them.

Usage & Packaging:

- Bath bombs should be packaged in airtight plastic or cellophane once they are fully dry. Our Small Cello Bags are perfect for this!
- To use, simply drop one bath bomb into warm bath water and watch the colorful powder fizz at it dissolves.
